During the year a new wire cable has been put onto the drop curtain. Several of the Town Hall seats have been repaired, and all the Orchestra and Court Room chairs and settees have been wired up, but only much needed repairs have been made to the building. Under the direction of the Selectmen, Prof. Hazen has prepared drawings of the rear of the building, to assist the architect in making his plans for the proposed enlargement of the stage, etc. This matter is to be brought before the voters at this meeting, and is worthy of your careful attention, as a modern, well-equipped stage would increase the revenue from the building as well as add to the safety of the public.

Respectfully submitted,

W. S. Carter for the Trustees.

REPORT OF BOARD OF HEALTH.

Aside from scarlet fever, the town has been remarkably free from contagious diseases.

The first part of the year there were about 20 cases of the disease in the same mild form. Then from May until November nothing was seen of it, but since then 16 cases have occurred up to the present time. In the eastern half of the town, including Lebanon village, there have been 4 cases of typhoid fever, only one case of which had access to the precinct water. Sewers have been constructed in the most needful places in Lebanon village during the past year, so now there are but a few scattered houses to which the public sewer is not readily accessible.

Two cases of typhoid fever, two of whooping cough and two of measles have occurred in the west part of the town during the year ending Feb. 15, 1911. The two cases of measles were reported and quarantined on the 14th of February, 1911.

There is urgent need of a sewer on Elm St., in West Lebanon, which, we expect, will be constructed during the present year. This will much improve the sanitary condition, as well as the general appearance of the banks on the east side of the B. & M. Railroad, where private sewers now discharge upon the surface of the banks.

The private sewer discharging into the culvert on South Main St. should be discontinued, and connection be made with the public sewer.

Better sanitary conditions could and ought to be maintained in relation to depositing or leaving waste

material in or near the brook and land east of the buildings on Main St., from Dana St. to the culvert on Main St.; also along the banks of the brook from the culvert to the Connecticut river.

A sewer has been suggested for the improvement of this locality. But a sewer of ordinary capacity cannot and will not perform the duty of a dump cart. More care taken NOT to deposit or leave waste material in this locality will clean up and improve the sanitary conditions complained of and make them much better for all concerned.

We believe that these suggestions, carefully put into practice, will improve a few other localities in town, not mentioned in this report, but well known by those desiring better sanitary conditions.

The Board of Health appreciates the effort of citizens to help them in their work by cleaning up unsanitary places, and by reporting to them conditions beyond their personal control.

Also for reporting contagious diseases and cases of sickness where they have reason to suspect that the disease *may* be contagious.

By continuing this effort the citizens can do much to aid in maintaining healthful and better surroundings for all.
